Location: Mandi, HP, India

Profile

Passionate and proactive Junior Research Fellow with hands-on experience in hydrological modeling, climate change impact analysis, and extreme events. Proven ability to drive collaborative research and achieve impactful results. Seeking opportunities to further contribute to hydrology and climate research.

Education

Indian Institute of Technology, Mandi — Mandi, India
PhD in Hydrology (Pursuing) — Jan 2023 – Present
Focus: Hydrological Modelling, Extreme Events, DL-Based RR Models, Climate Change

Maulana Azad National Institute of Technology (MANIT) — Bhopal, India
Master of Technology in Water Resource Engineering — July 2020 – May 2022
CGPA: 9.07
Thesis: Assessment of Streamflow in Ungauged Basin Using Physical Similarity Method

Maulana Abul Kalam Azad University of Technology — Kolkata, India
Bachelor of Technology in Civil Engineering — June 2016 – June 2020
CGPA: 8.73

Experience

Junior Research Fellow — Bhopal, India
National Institute of Hydrology (CIHRC) — May 2022 – Dec 2022

Water Availability Assessment for Project Formulation in Madhya Pradesh

- Analyzed physical characteristics of catchments using ArcGIS.
- Developed Rainfall-Runoff models using GR4J, GR5J, GR6J, and LSTM models.

Reassessment of Evapotranspiration Estimation for Irrigation Planning in MP

- Reviewed and evaluated different ETo estimation methodologies.
- Compared calculated ETo with station-based recorded ETo data.

Skills

Python (Data Analysis, Machine Learning, Deep Learning), R (Statistical Analysis), Advanced Excel (Data Visualization), ArcGIS (Geospatial Analysis), Matlab (Basic)

Languages

Bengali (Native), Hindi (Fluent), English (Fluent), Assamese (Native)

Honours & Awards

Received Google Academic Grants

Publications

Journal Papers

Under-Review Submissions

[16] **Hydro-meteorological and infrastructural damage analysis of the recent Ramban cloudburst event in Jammu and Kashmir, India**
Awasthi, S., Jose, A., **Barbhuiya, S.**, et al.
Under review in International Journal of Disaster Risk Reduction, 2025. (Area: Extreme Events)

[15] **Prospective altitude-driven drought dynamics in the Indus River Basin: Long-term climate-pathway insights**
Dubey, A., Swami, D., Gupta, V., **Barbhuiya, S.**, & Joshi, N.
Under review in Earth Systems and Environment, 2025. (Area: Extreme Events)

[14] **Dynamic modelling of landslide susceptibility in response to hydro-meteorological variability in the Himalayas**
Sharma, S., **Barbhuiya, S.**, Gupta, V., et al.
Under review in Scientific Reports, 2025. (Area: Extreme Events)

[13] **Projections of future streamflow for India informed by CMIP6 global climate models**
Sharma, V., **Barbhuiya, S.**, & Gupta, V.
Under review in Hydrological Processes, 2025. (Area: Climate Change)

[12] **Understanding future precipitation, temperature, and hazard risks in India under SSP245 and SSP585 scenarios**
Barbhuiya, S., & Gupta, V.
Under review in Acta Geophysica, 2025. (Area: Climate Change)

[11] **Indian Climate Information Explorer (INCLINE): A web-based climate-information platform for the Indian subcontinent**
Barbhuiya, S., Kashyap, K., & Gupta, V.
Under review in Climate Services, 2025. (Area: Climate Services)
